What We Deliver

Fundraising  
Discovery

36

In-depth analysis across 21 value axes for delivering a clear roadmap and timeline to address key challenges and prepare for a successful funding round.

Due Diligence

19

We conduct a deep dive into a company's core—evaluating management, technology, USP, business model, and traction—executing due diligence in two stages: pre-term sheet and post-term sheet.

Dashboarding

14

We present key information in an easily accessible way by constructing a startup's dashboard around three views: tactical, strategic, and topical.

Company Valuation

7

We produce valuation reports for startups and M&A transactions, combining financial analysis with deep sector insight to assess market dynamics, ecosystem positioning, and strategic multipliers.

Round Preparations

15

We help startups prepare for funding by identifying gaps in their story and materials, defining financials and key milestones for the next round, and setting up a well-structured data room.

Progress Tracking

11

We regularly track startups and companies—from early-stage (monitoring technology and team development) to those with commercial traction (through quarterly business reviews)—providing VC teams with clear visibility into their progress.

Exits

14

We enable strategic exits that deliver strong returns for investors and founders—even in slower-growth scenarios—while cultivating experienced entrepreneurial teams ready for future ventures.
