CONTACT US

DEEP-TECH CORPORATE FINANCE

TEAM

T Our global team, partnerships and network are focused on providing in-depth coverage of the deep-tech industries.

From universities through incubators and startups to corporations and venture funds, our focus is to provide our knowledge and expertise to management teams that are preparing to make "The Next Step".

Being content-driven means focusing on the company's full path, not just the transaction.

Although classified as corporate finance, 90% of our team has deep-tech backgrounds, including process equipment, IP libraries, multicore programming, IoT security, process simulation, and SOC design. Our team comprises former CEOs, CTOs, fund managers, entrepreneurs, and investment bankers.

SOME OF OUR PROJECTS

PROJECTS

We offer comprehensive corporate finance services, including M&A, MBO, and raising funding through venture capital, private equity, or investment banks.

We have a comprehensive network and, through our proven knowledge and expertise in deep tech, we are also engaged in projects not so common to corporate finance. From technical due diligence for VCs or PEs on deep-tech propositions such as bitcoin ASICs or quantum circuits to corporate consulting on strategic innovation or governmental advice on deep-tech strategies.

DEALS

D We operate globally, with Associates in the US, Canada and Europe. We are primarily contacted through our network by

word of mouth, highlighting the quality of our work and the satisfaction of our customers. We collaborate with partners to expedite projects and increase the quality of the final transaction.

ABOUT US

S

TD Shepherd is a corporate finance boutique serving the deep-tech sector including semiconductor-, IT-, cyber- and related high-tech industries with

our various services.

TD Shepherd provides a unique blend of corporate finance expertise, hands-on experience with high-tech, high-potential companies and a rich network of Dutch, European, Asian and US venture funds, PE parties and corporate venture funds.

NETWORK

We pride ourselves on our unmatched network in deep-tech fields, with Associates active in organizations like IEEE and ACM.

TD Shepherd is also an active member of global organizations such as GSA and IEEE. We have also established a number of turn-key partnerships with Microtech Ventures, HighTech Startbahn, and respected corporate finance companies similarly focused. This enables us to quickly and efficiently access relevant parties outside of our own network. With our Associates present globally in key locations, we always have a direct contact in the same time zone.
